AB - J04236256 Compsn. comprises: (a) 100 pts. wt. of methacryl resin; and (b) 0.01-0.5 pts. wt. of a hydrocarbon mixt. contg. 70 wt.% or more of 20-26C linear satd. hydrocarbon. (a) is methylmethacrylate homopolymer or copolymer with alkyl acrylate, other alkylmethacrylate, vinyl aromatic cpd., cyano vinyl cpd. or maleimide cpd. (b) is a mixt. of 70 wt.% or higher of eicosane, heneicosane, docosane, tetracosane, pentaicosane or hexaicosane which may contain other hydrocarbon.

- USE/ADVANTAGE - Compsn. gives higher clear injection-moulded article having no stain and haze. It shows good releasability at the time of moulding precise and complicated articles.
